

FRANK PALLONE, JR., NEW JERSEY
CHAIRMAN

CATHY McMORRIS RODGERS, WASHINGTON
RANKING MEMBER

ONE HUNDRED SEVENTEENTH CONGRESS
Congress of the United States

House of Representatives

COMMITTEE ON ENERGY AND COMMERCE

2125 RAYBURN HOUSE OFFICE BUILDING

WASHINGTON, DC 20515-6115

Majority (202) 225-2927

Minority (202) 225-3641

March 10, 2022

Gene Karpinski, President
League of Conservation Voters
740 15th Street NW, 7th Floor
Washington, DC 20005

Mr. Karpinski:

Publicly available information suggests that Russian President Vladimir Putin funds certain environmental non-governmental organizations (e-NGOs) around the world to create fear among other nations' use of hydraulic fracturing ("fracking") to ensure dependence on Russian gas.¹ His success in using Russian energy to control other countries in Europe should serve as a wakeup call to the world, particularly as we watch Russia's continued brutal attack on the Ukrainian people.

In 2014, Former NATO Secretary General Anders Fogh Rasmussen warned of Putin's dark money machine. Specifically, he noted that "Russia, as part of their sophisticated information and disinformation operations, engaged actively with so-called nongovernmental organizations – environmental organizations working against shale gas – to maintain dependence on imported Russian gas."² Unfortunately, it appears to have worked. According to the International Energy Agency (IEA), the European Union (EU) went from producing almost 10 million TJs of natural gas in 2000, a higher level than Russia's own production, to just under 4 million TJs in 2020.³ Meanwhile, while Russia was working to undermine the EU's production, Russia increased its own production and exports. As a result, the EU is now reliant on Russia for 40% of its natural gas consumption.⁴ It appears undisputed that Putin's campaign to weaken

⁴ IEA, *How Europe can cut natural gas imports from Russia significantly within a year*, (Mar. 3, 2022), available at <https://www.iea.org/news/how-europe-can-cut-natural-gas-imports-from-russia-significantly-within-a-year>

European energy security and increase their reliance on Russia was an overwhelming success. This must not happen in the United States.

Former Secretary of State and then-presidential candidate Hillary Clinton decried “phony environmental groups” funded by Russia to “stand against any effort” related to United States’ use of hydraulic fracturing to develop shale gas.⁵ Secretary Clinton stated that “a lot of the money supporting” the anti-hydraulic fracturing movement in the U.S. was “coming from Russia.”⁶ Further, in January 2017, the Office of the Director of National Intelligence released a report that included “clear evidence that the Kremlin is financing and choreographing anti-fracking propaganda in the United States.”⁷ The report also found that RT, the Kremlin’s principal international propaganda outlet, ran “anti-fracking programing, highlighting environmental issues and the impacts on public health” given the “Russian Government’s concern about the impact of fracking and US natural gas production on the global energy market.”⁸

Additionally, in 2019, Former Senior Director for Europe and Russia at the United States National Security Council, Fiona Hill, testified that Russia has been working to undermine the use of hydraulic fracturing in the United States because Putin sees “American fracking as a great threat to Russian interests” and that a hydraulic fracturing ban would “play into strengthening Putin’s hands.”⁹ It has been alleged that Putin is using a San Francisco-based e-NGO, the Sea Change Foundation (Sea Change), to funnel money into U.S.-based environmental advocacy efforts designed to undermine American energy production. According to a 2014 report, Sea Change receives contributions from a “Bermuda-based company called Klein Ltd.”¹⁰ which is used “for funneling Russian government money to American environmental groups in order to undermine U.S. natural gas and oil production to Russia’s benefit.”¹¹ Notably, reports suggest that your organization is one of the top e-NGO recipients of Sea Change grants since 2006.¹²

Provided the public reporting of Putin’s dark money influence in Europe and the concerns surrounding similar efforts in the United States, we write today to explore your connections with Sea Change. Any action by President Putin, the Russian government, or

Putin's allies to undermine American energy security must be addressed. Accordingly, to assist in our effort to uncover any attempt by Russia to weaken America, we ask that you please provide responses to the following no later than March 25, 2022:

1. It has been reported that your group is one of the top recipients of Sea Change grants since 2006. As it relates to your connection with Sea Change, please answer the following:
 - a. Please identify the total amount of funding you have received from Sea Change since 2006 and include a breakdown for each year.
 - b. For each year you received funding, please identify what specific efforts the funding was designed to support.
 - c. Are you aware of concerns that Sea Change may be a conduit for Russian funding? If yes, when did you become aware and what steps did you take to address such concern?
 - d. Has your organization lobbied against federal or state efforts to increase hydraulic fracturing in the U.S. and, if so, was any of that advocacy done using funding you received from Sea Change?
2. Does LCV currently or has LCV previously received funds or anything of value directly or indirectly from the Russian Government or any individual or organization connected to the Russian Government?
 - a. If yes, please provide the specific amount or thing of value you received, the date on which you received it, and the purpose for receiving such funds or things of value.
3. Does LCV currently or has LCV previously taken any action at the request of the Russian Government or any individual or organization connected to the Russian Government?
 - a. If yes, please detail what action was taken and the date on which such action was taken.
4. In view of the recent bilateral pact between China and Russia, China's continued support of efforts to defeat sanctions our allies are placing on them, and the substantial reliance the U.S. economy would have on China for materials to meet a fossil fuel free economy, please answer the following:
 - a. Does LCV currently or has LCV previously received funds or anything of value directly or indirectly from the Chinese Communist Party or any individual or organization connected to the Chinese Communist Party?

- i. If yes, please provide the specific amount or thing of value you received, the date on which you received it, and the purpose for receiving such funds or things of value.
- b. Does LCV currently or has LCV previously taken any action at the request of the Chinese Communist Party or any individual or organization connected to the Chinese Communist Party?
 - i. If yes, please detail what action was taken and the date on which such action was taken.

If you have any questions, please contact Republican Committee Oversight and Investigations staff at (202) 225-3641. Thank you for your prompt attention to this request.

Sincerely,
